DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. The claims are indefinite because it is unclear how many components are to be in the composition. The use of functional language creates an overlap in scope between the claimed ingredients. The "plasticizer" and "surface modifier" are conventional additives. As such, one compound can read on each ingredient.
4. The term "waxlike" is indefinite. It is unclear how this further limits the claim.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1713

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-10 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1-17 of U.S. Patent No. 6,774,162. Although the conflicting claims are not identical, they are not patentably distinct from each other because the plasticizer claimed in the patent overlaps in scope with the surface modifier instantly claimed.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

9. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Itoh et al. US 5,856,399 or Ouhadi et al. US 5,843,577.

Art Unit: 1713

10. Each of the cited patents shows vulcanizates having improved surface properties. The claimed rubber and thermoplastic ingredient are discussed in the abstract of each patent. The use of plasticizers or softeners, is identified in the abstract of Itoh et al. and at column 5 lines 45+. The patents do not specifically identify a surface modifier which migrates uniformly and forms the claimed layer. The claimed modifier is a known plasticizer. These plasticizer species are identified at column 5 lines 45+ of Ouhadi et al. and Itoh et al. at column 6 lines 15+. It would be obvious to formulate the claimed article given that each of the patents teach the formation of molded articles from compositions which can be the same as those claimed. Case law has well established that it is obvious to select ingredients from a list.
